Rahul Rajput

Software Engineer | Full-Stack & Mobile (React, React Native, Node.js, TypeScript)

linkedin.com/in/rahul-rajput-828a71216 | github.com/RahulRajput025 | Mohali, Punjab, India

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3+ years of experience shipping production web and mobile products in React.js, React Native, Node.js, TypeScript, MongoDB and PostgreSQL. Led engineering at Vedic Vaibhav across four consumer platforms and their mobile apps, and led ChildcarePro, an Australian childcare management platform for Long Day Care, Outside School Hours Care (OSHC) and Family Day Care services. Hands-on with real-time chat systems, payment integration and AI-driven automation, and experienced in running business and sales operations alongside technical leadership.

PROFESSIONAL EXPERIENCE

Vedic Vaibhav.com Pvt. Ltd. Aug 2024 – Sep 2026

Software Engineer (Technical Lead) · Full-Stack, Mobile & Business Operations India

- **Led engineering** for the company's product portfolio and its Android/iOS apps: **vedicvaibhav.com** (online puja, chadhava and prasad booking from temples across India), **astrovaibhav.com** (astrologer chat and call consultations, Kundali and horoscope tools), **vedicshop.store** (spiritual products e-commerce) and **panditjiatrequest.com** (on-demand pandit booking for puja, havan and ceremonies).
- **Led ChildcarePro**, the company's flagship project: an Australia-based childcare management platform with a large multi-service dashboard for Long Day Care, Outside School Hours Care (OSHC) and Family Day Care providers, covering enrolments, attendance and sign-in, bookings, educator and staff management, parent communication, billing and compliance reporting for Australia's Child Care Subsidy (CCS) environment.
- **Built real-time chat and voice consultation** features with Node.js and WebSockets for astrologer sessions, including per-minute billing, wallet flows and Razorpay payment integration.
- **Integrated AI-automated systems** such as AI astrology chat, automated Kundali report generation and workflow automation, using Node.js and Python services.
- **Owned architecture and delivery** end to end: React.js and TypeScript web apps, React Native apps published on Google Play and the App Store, Node.js REST APIs, MongoDB and PostgreSQL data layers, code reviews and releases.
- **Handled business and sales operations**: requirement gathering, proposals and pricing, partner coordination and go-to-market for new product launches, working directly with founders and customers.

Mind2Web LLP Aug 2023 – May 2024

Associate Software Developer Mohali, India

- Developed new features for **Service Points**, a large Netherlands-based drop-shipping platform (CodeIgniter/PHP, React.js, Node.js), improving platform efficiency and user experience.
- Migrated the backend from PHP to **Node.js** and the database from MySQL to **MongoDB**, improving scalability and performance.
- Built a scalable real-time **chat application** with Node.js, Redis and Pub/Sub messaging; contributed to AI chatbot response optimization.

Impavid Technologies Feb 2023 – Jun 2023

Web Developer Intern Bangalore, India

- Delivered four live institutional and corporate websites (Atria University, RLJIT, Ghousia Group of Technologies, Magsol Industry) using HTML, CSS, Bootstrap, JavaScript, PHP and MySQL.
- Built an Angular + Firebase blog application and an Angular, Node.js and MongoDB CRUD application.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3

Frontend & Mobile: React.js, React Native, Angular, Redux, Responsive UI, Bootstrap, Figma

Backend: Node.js, Express.js, REST APIs, WebSockets, Redis Pub/Sub, Django, CodeIgniter, Microservices

Databases: MongoDB, PostgreSQL, MySQL, Redis, Firebase

AI & Automation: AI chatbot and LLM integration, AI-automated workflows, ML model deployment (scikit-learn, joblib)

Cloud, Tools & Payments: AWS, cPanel, Git/GitHub, Postman, Google Play Console, App Store Connect, Razorpay

Leadership: Technical leadership, project management, client communication, requirement analysis, sales operations

PROJECTS

- **Heart Disease Predictor** – Predicts heart disease risk from medical parameters; Python ML model (scikit-learn, joblib) served via Django. github.com/RahulRajput025/Heart-disease-predictor
- **E-Commerce Web Application** – Payment gateway, cart, wishlist, user profiles, orders and email notifications (PHP, MySQL, JavaScript, Bootstrap).

EDUCATION

B.Tech, Computer Science & Engineering – I.K. Gujral Punjab Technical University, Mohali Campus-1 2019 – 2023 · CGPA 8.03
